

Joana Gomes

Full-Stack Web Developer

PROFILE

Junior Web Developer with a degree in Marine Biology. Recently, I got curious about programming, and after some research and talking with friends in the relative field I have been determined to learn new skills, and develop my problem-solving, logical reasoning and creativity skills.

Now, taking my first steps in this new world, I am devoted and enthusiastic to develop my knowledge in the software development industry.

PROJECTS

devHub - Final Project

REACT - JAVASCRIPT - CSS - AXIOS - CLOUDINARY - CYCLIC - NETLIFY - MONDO DB - FIREBASE - API
<https://dev-hub-front.netlify.app/>

Our platform allows users to easily share job opportunities and exchange tips with other developers. In addition, users can take quizzes to refresh their knowledge and engage in real-time conversations with the devHub community via our Firebase-based chat. As a result, we were awarded both the most difficult code-wise and the best overall project prizes.

The Hungry Snake

HTML5 - CSS - JAVASCRIPT - CANVAS
https://peterloyal.github.io/Project_1/

Classic snake game, in a marine environment with some shrimps to eat, with a bonus of some trash that she need to avoid, developed with Canvas and DOM manipulation.

Kiddo's Care Babysitting

MONGO DB - EXPRESS - CLOUDINARY - CYCLIC - HTML5 - CSS - JAVASCRIPT - HANDLEBARS
<https://kiddoscare.cyclic.app/>

Babysitting platform that connects parents with local babysitters. It allows parents to search for babysitters in their area based on their availability, experience, and other criteria. Also allows individuals to create profiles as babysitters and offer their services to parents.

WORK EXPERIENCE

Dive Guide and Marine Biologist

CIPREIA Dive Club, 2021 – 2022

Internship IEPF ACTIVAR.PT – worked as a skipper; daily maintenance of the needs of the school. Divemaster (dive guide).

Marine Mammals Assistant Trainer

Lisbon Zoo, 2016 – 2021

Train and care of a variety of marine species such as dolphins, sea lions and penguins. Ensuring physical and mental exercises to keep animals healthy. Maintenance of the habitat.

TAMAR Project - Sea Turtles

Brazil, Ubatuba, 2014

Development of environment education about sea turtles; beach rescue of sea turtles; maintenance of the project's structures.
